EDUCATION

SDU University

Kazakhstan, Almaty

Bachelor of Computer Science, 3.21/4.0 GPA

Sep. 2021 – July 2025

- Full Tuition Fee Scholarship
- Relevant Coursework: Introduction to Data Analysis , Probability and Mathematical Statistics , Statistics and Visualization for Data Analysis , Applied AI , Introduction to Algorithms , Full-Stack Project Development , Software Engineering , Database Management Systems 1 , Research Tools and Methods .

HKBU

Hong Kong

MSc in Data Analytics and AI

Sep. 2025 – June 2026

- Full Tuition Fee Scholarship
- Relevant Coursework: Artificial Intelligence, Python for Data Analytics and Artificial Intelligence, Quantitative Methods for Data Analytics and Artificial Intelligence, Principles and Practices of Data Analytics, Big Data Analytics, Cloud Computing, Financial Technology, Business Intelligence.

EXPERIENCE

HalalDamu Website Data Analysis

November 2024

Python (Web Scraping, Pandas, Data Cleaning, Visualization)

SDU University

- * Built a Python script to scrape halal certification data from the HalalDamu website.
- * Collected and processed data for 1000+ companies, performing data cleaning and preprocessing using Pandas
- * Used basic SQL queries and Python to filter, organize, and analyze certification data for reporting and insight generation
- * Created tables and visualizations to identify patterns in valid and expired certificates
- * Identified inconsistencies in certification across restaurant branches and highlighted potential compliance issues
- * Generated insights to support data-driven awareness of outdated or missing halal certifications

Project: Customer Churn Prediction (Spotify)

March 2026

- * Developed a churn prediction model using Python and Scikit-learn.
- * Performed data preprocessing and feature engineering using Pandas.
- * Conducted exploratory data analysis to identify key user behavior patterns.
- * Built classification models (Logistic Regression, Random Forest) and evaluated performance using ROC-AUC.
- * Identified key churn drivers such as low engagement and poor recommendation satisfaction.
- * Provided data-driven insights and retention strategies to improve customer engagement.
- * Generated business insights and proposed retention strategies based on user behavior

Teaching assistant at SDU University

Sep. 2024 - Dec. 2024

- * Responsible for assessing student assignments and providing detailed feedback to enhance learning outcomes.
- * Supported the professor by guiding students through technical difficulties and core concepts during office hours.
- * Mentored freshman bachelor students in foundational Data Structures and Algorithms, focusing on logical problem-solving and algorithmic thinking.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C++, SQL , HTML, CSS

Developer Tools: Git, VS Code, Jupyter Notebook, Figma, Power BI, Docker

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, PyTorch

Languages: English B2, Kazakh C2, Russian B2, Turkish B2 **Soft skills:** Communication, Analytical thinking, Problem-solving, Teamwork, Adaptability
